Studio 46

The Studio 46 is Artison's sucessor to its original Sound Bar, the SB1. It is a high performance solution for those who demand quality...without compromise.

Universally attachable to any Flat Panel Television, the audio and video remain integrated regardless of the type of installation. Designer grilles are custom made to match the width of the set making the speaker visually blend with the display.

The extruded aluminum enclosure is extremely rigid yet it's slim profile integrates with the thinnest displays. Proprietary Carbon Fiber Woofer/Midranges, Vifa DX Super Audio Tweeters and side firing Stage Tweeters combine the Audio and Video in a way that can only be described as a Total Involvement Experience. ®

Studio 46

- Attaches to the Television, allowing the audio to travel with the video, in every installation. The integration of the senses is more pleasing and accurate than traditional fixed speaker designs.
- Designer grills precisely match the width of the display, effectively making them disappear. The system's adaptability allows it to be moved to another television by simply changing the grille.
- Side firing Stage Tweeters, make the sound stage extend far beyond the video.
- The aluminum cabinet is extremely rigid yet thin, providing for a system that will work with any display without sacrificing performance.
- Long Throw Carbon Fiber Woofers and Vifa DX Super Audio Tweeters deliver "state-of-the-art" audio, for accurate and dynamic reproduction.

Specifications

- DIMENSIONS: 4.1"(104mm)h x 44.7"(1135mm)w x 2.2"(56mm)d
- MINIMUM GRILLE DIMENSIONS: 4.75"(121mm)h x 45.4"(1153mm)w x 2.7"(69mm)d
